DETAILED ACTION

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112: The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention. 1.
- Claims 8 and 10-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter 2. Which applicant regards as the invention.
- Claim 8 recites the limitation "the rods" in line 1. There is insufficient antecedent basis for this limitation in the claim. Only one rod was set forth in the parent claim. Claims 10 and 20 recite the limitation "the openings" in line 6 (of both claims).
 - There is insufficient antecedent basis for this limitation in the claim. The term should be replaced with --the at lest one opening--.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public A person shall be entitled to a patent unless -(b) the invention was parented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States
- Claims 1-9 are rejected under 35 U.S.C.·102(b) as being anticipated by Sparlin et 6.

al.

Application/Control Number: 10/054,337

Art Unit: 3672

Sparlin et al. discloses a well screen that includes a base pipe 2 having at least one hole 2a, a filter 5, a plurality of splines 6, and a rod 3. The reference further teaches various numbers and sizes of holes, the rods adjustably placed, and the filter itself acts as an erosion inhibitor by preventing harsh downhole elements from eroding the pipe.

7. Claims 10-16 and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Cornette et al.

Cornette et al. discloses a screen that includes a base pipe 40 having a plurality of holes, and a sleeve 41 having at least one opening. The reference further teaches various numbers and sizes of holes, the sleeve adjustably placed, and a filter 21 acts as an erosion inhibitor by preventing harsh downhole elements from eroding the pipe.

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 3672

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

10. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cornette et al. in view of Castano-Mears et al.

Cornette et al. discloses a screen as stated above. However, the reference fails to teach longitudinal slots as called for in the claimed combination.

Castano-Mears et al. teaches a well screen that includes longitudinal slots 56 for the purpose of enhancing torsional and tensile strength of the pipe.

It would have been considered obvious to one having ordinary skill at the time the invention was made to have provided the screen of Cornette et al. with longitudinal slots in view of Castano-Mears et al. in order to enhance the base pipe strength.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zakiya N. Walker whose telephone number is (703) 305-0302. The examiner can normally be reached on Monday-Thursday, 6:30 AM-5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bagnell can be reached on (703) 308-2151. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-3597 for regular communications and (703) 746-3826 for After Final communications.
